LETTER OF RECOMENDATION FOR MR. ZORAN LAZIĆ

To whom it may concern

It is my pleasure to provide this letter of recommendation for Mr. Zoran Lazić as he seeks further career opportunities outside our organization.

I've worked closely with Mr. Lazić for over 8 years and relied greatly on his expertise and knowledge in the field of software engineering. His vast, but also deep understanding of numerous technical topics has made him not only one of the rare persons in our company to which we turned for his exact, useful and meaningful advice, but also one of the lead software engineers in the group.

On a personal level, he is concentrated and focused, both qualities that have served him well in his role as software engineer. His strive to always know more is a quality which is especially commendable.

During his tenure in our organization, Mr. Lazić was responsible for development and design of critical ticketing software products for major clients around Europe. Some of his work during this period include development of search and indexing service for high-availability system based on Lucene module (Java), development of front end and backend components for critical ticketing software products (PHP / Java / JavaScript), integration of ActiveMQ for high load system (Java), development of SingleSignOn solution for ticketing provider (PHP), remote logging solution for ticketing provider (Java), integration of Apache Jackrabbit for a file repository project (Java) and prototype development for online receipt system (Java).

I'm confident that he will continue his high level of work and technical deliverables that will meet and surpass expectations in which ever organization Mr. Lazić continues his professional career.

Please feel free to contact me at +386 590 73502 or vojko.kercan@dhimahi.com for any further questions.

Sincerely,

Vojko Kercan, Managing Director
